

Using a ruler, draw lines joining the pairs of points that have the same number, so connect 1 on the bottom to 1 on the lower right side, then 1 on the lower right side to 1 on the upper right side, and so on. Once you've connected the 1's, move on to the 2's, then the 3's,... You'll love what you get!

**Variation:** Connect the matching pairs, but using sides that are separated from one another by a side that you do not use. Connect three pairs of sides in this way.
